# Employee Incentive Program

## Fuel Discount Benefit

We are proud to offer a unique employee benefit to employers – discounted fuel rates for their employees. These rates, typically only available to moEV subscribers, can now be offered to employees as a valuable retention incentive at no cost to the employer.

## The Process

We enroll all employees into the program by having employees scan the QR Code you see in the bottom left of this brochure! Each employee will be sent separate agreement upon completion of the QR application. The agreement outlines the requirement to have employees setup automatic payment options, and not doing so will result in the immediate suspension of their fuel card, benefiting all parties involved!

Upon subscription, we deliver fuel cards to employees along with usage instructions and a list of nearby locations in their area.

The employer only needs to inform us when an employee leaves the company so that we can promptly stop the fuel card usage.

**Contact us today to learn more and start offering this incentive to your employees.**

At moEV, we're thrilled to offer small and medium-sized businesses like yours access to our discount fuel program. By leveraging the collective buying power of our moEV business network, you can enjoy fuel rates on par with major corporations.

## How to does it work?

Enrolling with our bulk fuel program is seamless. Once we've settled on the rate with you, we'll forward the contracts to the appropriate signing authority in your business and handle the payment setups.

After you've signed the contracts, we'll dispatch the right number of fuel cards to you and guide you through the on-boarding process for our fuel program.

\*For the full terms and conditions of the moEV Fuel Program please contact moEV at 403-768-2069. moEV may amend the terms and conditions of the Fuel Program at any time including the discount available to members

This estimate is based on a comparison between the price for regular fuel available to moEV's Fuel Program participants over the period from 2021 to 2022 as compared to the average posted price available at fuel retailers over the same period.
